Predator 55

The Sunseeker Predator 55 is a striking member of Sunseeker’s iconic Predator range. Powered by twin Volvo Penta IPS-950 engines, this 55-foot yacht delivers impressive performance with top speeds reaching up to 36 knots.

A defining feature of the Predator 55 is its retractable glass and carbon fibre sunroof. Measuring 2.5m x 3m, the electrically operated sunroof glides aft at the touch of a button via the helm console, opening the space to the sky above. This, combined with expansive glazing and a sweeping, double-curved single-piece windshield, creates a light-filled interior and a commanding exterior aesthetic.

The aft cockpit seating can be repositioned to meet the fixed seating and table amidships with ample space for six and complete with an electrical sun canopy. The large sun pad over the garage features adjustable headrest bolsters and a view aft that guests will never tire of. Style and functionality work cohesively to define a yacht built for enjoyment. The angular aft fairleads form part of a stylish new rear design, integrated seamlessly into the hull with scalloped stainless steel engine vents sitting vertically outboard. With the addition of low-level LED deck lighting and a new fixed signature transom traverse, connecting port to starboard even with the bathing platform lowered, the aft profile is exquisitely proportioned without compromising functionality.

Technical parameters

Shipyard	Sunseeker
Range	Performance
Lenght	17,15 m
Beam	4,95 m
Draft	1,40 m
Performance	36 knots
Guests	4-6
